DETAILED ACTION

Claims 1-18 are pending in this application.

Action Summary

1. The objection of claims 8-10 and 12-17 under 37 CFR 1.75(c) is hereby withdrawn.
2. The provisional rejection of claim 1-7 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, and 4-6 of copending application 10/625,129 is being maintained for the reasons stated in the previous office action.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-7 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2 and 4-6 of copending Application No. 10/625,129. Although the conflicting claims are not identical, they are not patentably distinct from each other because both copending applications are directed towards a pharmaceutical composition comprising an anticholinergic agent of formula 1, and a betamimetic compound. Claim 1 of '048 (instant application) employs broad claim language "comprising" with respect to what it may contain and is not limited by what is claimed. Therefore, one of ordinary skill in the art could add additional active agents to the composition to assist in the intended use of the composition. With respect to the claimed ratio of formula 1' to 2, absent a clear showing of criticality, the determination of particular ratios is within the skill of the ordinary worker as part of the process of normal optimization to achieve the desired results of the claimed composition. The selection of a particular isomer (R or S) would have been obvious to one of ordinary skill in the art during experimentation as a part of determining which isomer would be more effective in treating the disorder.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

4. Applicant's arguments filed October 16, 2006 have been fully considered but they are not persuasive.

Applicants argue that the copending application is directed toward a betamimetic generally and not the specific betamimetic as claimed by applicant in the instant invention. Betamimetic is a broad class of drugs, which can comprise their salts, solvates or hydrates. Therefore, any betamimetic drug (i.e. as claimed in the instant application) comprising a salt, solvate or hydrate thereof, reads on the invention.

Conclusion

5. Claims 1-7 remain rejected.

6. Claims 8-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
